ClearView™ CO2 Capnography Adapter Instructions

1. Remove one of the double connectors near the mask side of the scavenging tubing (choose either side).

2. Insert the ClearView™ Capnography Adapter into the tubing as shown.

3. Unwrap and attach a ClearView™ Nasal Mask to the capnography adapter and double connector. Make sure to carefully guide the inner mask over the capnography adapter extension tube.

4. Check to ensure that the extension tube of the ClearView Capnography Adapter is visible just inside the ClearView inner mask.

5. Attach the ETCO2 sample line from the monitor to the Luer Lock fitting on the ClearView Capnography Adapter.

Cautions and Warnings:
Single use only. Do not reprocess or reuse.
Refer to manufacturer’s manuals for capnography equipment operation.
Refer to flowmeter user manuals such as 26546 for nitrous oxide contra-indications.
